Boycott new world carp New World Carp is a horrible online store! I had to pay out the nose for shipping. My package was "lost" in customs for quite a while. When it did finally show it was short!!!!!! I emailed them and was assured that so and so hand packed it himself. They eventually sent me the rest of my items. Guess what? It was wrong !!!!! The leads are painted online but they are bare lead and to top it off they shipped me a 60g and a 90g instead of two 60's. Guess what else? The 60g had been "repaired" with a glue gun and had fallen apart in shipping. Just save your money and choose to order from somewhere fantastic like Big Carp Tackle. They may be out of stuff sometimes but it's because they are used by a lot of us Yankee carpers.
